TEAM**

Shelby is now an RP₃ Community

RP₃ stands for Reliable Public Power Provider, a certification awarded by the American Public Power Association. In order to qualify as an RP₃ utility, many aspects of the electric system are measured, including reliability, safety, training and system improvement. Out of more than 2,000 public power utilities nationwide, 102 utilities are designated RP₃, with 22 of them right here in North Carolina.

Congratulations to the North Carolina Public Power RP₃ communities: Albemarle, Apex, Ayden, Cherryville, Elizabeth City, Farmville, Fayetteville PWC, Gastonia, Granite Falls, Greenville Utilities Commission, High Point, Kinston, Lumberton, Monroe, Morganton, Newton, Rocky Mount, Selma, Shelby, Smithfield, Tarboro and Wake Forest.

The City of Shelby is proud to be one of the more than 70 public power communities in North Carolina. These communities own and operate their electric systems, offering customers excellent, local customer service, reliable electricity and prompt restoration after outages.
