About the Agency

NCEMPA is a state-chartered municipal corporation formed in 1976 by cities that owned and operated electric distribution systems but did not own generating or transmission facilities. At that time, the cities were wholesale customers of either Progress Energy Carolinas, Inc. (PEC) or Dominion North Carolina Power.

The Power Agency owns interests in five generating units built and operated by PEC. These facilities include three nuclear units – Brunswick Units 1 and 2 in Brunswick County and Shearon Harris Nuclear Power Plant in Wake County, and two coal-fired units - Mayo Plant and Roxboro Unit 4 in Person County.

Management services for the Power Agency are provided by ElectriCities of North Carolina. Inc.

Quarterly Update

Devastating tornadoes struck North Carolina in April. NC Public Power Communities were largely spared substantial destruction. In the areas where customers did lose power, local public power line crews worked quickly to repair lines and service while keeping everyone safe.

As North Carolina was recovering, a massive storm system struck the southeastern U.S. More than 70 lineworkers from the NC Public Power communities of Kings Mountain, Gastonia, Greenville Utilities Commission, High Point, Kinston and Rocky Mount traveled to help restore power in Chattanooga, Tenn., after that city's electric system was destroyed and more than 100,000 people were left without power.

ElectriCities held a summer preparedness webinar in June. The webinar featured tips to aid customer service employees in helping customers understand how extreme heat impacts their electric usage. A recording of the webinar can be heard on electricities.com.

NC Public Power Communities made up an overwhelming number of Reliable Public Power (RP3) award recipients during the American Public Power Association Annual **Engineering and Operations Technical** Conference, Nine NCEMPA member cities were honored: Ayden, Elizabeth City, Greenville Utilities Commission, Kinston, Lumberton, New Bern, Selma, Smithfield and Wake Forest. RP3 recognizes public power utilities that demonstrate proficiency in four key disciplines: reliability, safety, training and system improvement. Criteria within each category are based on sound business practices and represent a utilitywide commitment to safe and reliable delivery of electricity.

Forty-six NC Public Power Communities received safety awards for incurring no lost work days for the calendar year.

ElectriCities and the state's two municipal

power agencies, North Carolina Eastern Municipal Power Agency (NCEMPA) and North Carolina Municipal Power Agency Number 1 (NCMPA1), will not oppose the pending Duke Energy and Progress Energy merger currently under review with various state and federal agencies. The Power Agencies recently negotiated agreements with Progress and Duke after a detailed analysis of the merger filings.

ElectriCities staff has been reviewing contracts and working with Duke and Progress since the merger was announced in early January. From the outset, ElectriCities staff was concerned primarily with:

- Protection for Public Power customers from increased costs related to the combination of the two companies;
- Ensuring that merger-related savings from any synergies or reductions in fuel expenses would be passed through to customers:
- Ensuring that the Power Agencies' competitive position does not deteriorate; and
- Maintaining access to competitive wholesale markets so that the Power Agencies can maintain and continue to improve wholesale prices.

The agreements are subject to the completion of the merger. The terms of the agreements have been approved by the Board of Directors and Boards of Commissioners of NCEMPA and NCMPA1.

In economic development news, West Pharmaceutical Services announced a \$29 million investment in its Kinston facility over the next five years; QVC shopping channel plans to spend \$71 million to expand its Rocky Mount distribution center and add 200 jobs; Superior Essex, Inc. will invest more than \$58 million and create 116 in Tarboro.

Second Quarter Performance

Participant sales decreased \$912,000 (.5%) as compared to the second quarter of 2010. Billing demand increased 72 MW (2.2%) and energy sales decreased 40,383 MWh (2.2%). The increase in billing demand is primarily attributable to the reporting of higher coincident peaks. The decrease in energy sales is primarily attributable to the milder weather conditions experienced in the second quarter of 2011 compared to the same period for 2010.

Fuel decreased \$4,575,000 (18.6%) as compared to the second quarter of 2010. The variance is primarily attributable to a decrease in the nuclear fuel amortization rate required to maintain a minimum fuel account level. In addition, lower generation from the fossil units contributed to overall decrease in fuel costs.

Purchased power costs decreased \$1,806,000 (4.7%) as compared to the second quarter of 2010. Energy purchases decreased 15,980 MWh (2.6%), as compared to the second quarter of 2010. The decrease in energy purchases is primarily attributable to lower Participant requirements resulting from milder weather conditions experienced in the second quarter of 2011 compared to the same period in 2010.

Transmission and distribution decreased \$645,000 (11.4%) relative to the second quarter of 2010. During the second quarter of 2011 the Agency received a refund for prior year transmission expenses; no such refund was received in the second quarter of 2010.

Administrative and general – PEC decreased \$329,000 (4.1%) as compared to the second quarter of 2010. The variance is primarily attributable to less property and business interruption insurance costs reported in the second quarter of 2011 as compared to the same period in 2010.

Reserve and Contingency fund deposits increased \$1,345,000 (19.7%) as compared to the second quarter of 2010. The increase is attributable to higher capital expenditures anticipated in 2011 as compared to 2010.

Financing Status

As of June 30, 2011 NCEMPA had outstanding \$ 2,254,510,000 in bonds.

The weighted average interest cost of the NCEMPA outstanding debt at the end of

the quarter was 5.437%.

To date, NCEMPA has had \$1,419,721,061 in debt redeemed prior to or at maturity.

NCEMPA Balance Sheets

Per accounting principles generally accepted in the United States of America (GAAP) (Unaudited) (\$000's)

NCEMPA Plant Status

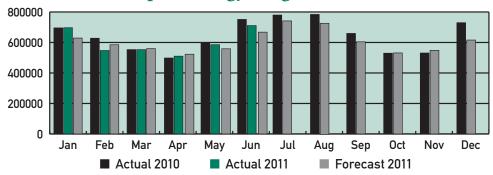

NOTE: The plant status values are year-to-date through June 30, 2011.

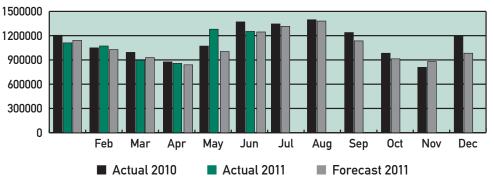

- Capacity Factor The ratio of actual output to maximum net dependable capability.
- Availability Factor The ratio of actual time a unit was available to produce power (regardless of whether it did) to the total time in the period.

Second-quarter highlights: Harris Unit 1 had no outages during the second quarter. Brunswick Unit 1 planned maintenance outage began 5/4. The four day outage ended 5/8. Brunswick Unit 2 began power ascension on 4/16, after a 42 day scheduled refueling outage, which began the evening of March 4th.

NCEMPA Participant Energy Usage (in MWh)

NCEMPA Participant CP Demand (in kW)

NOTE: * NCEMPA Energy and CP Demand are at the Power Agency to City Billing. Point and includes the SEPA allocation. Actual data are not weather normalized.

** The Forecast Year 2011 is from the NCEMPA 2010 Revised Load Forecast.
