

Aug. 12-14 | Williamsburg, Va.

Assessing Your Long-Term Competitiveness

Agenda

- Significant changes in the energy industry
- Creating a roadmap
 - Retail customer survey
 - Utility Assessment
- Case Study #1
- Case Study #2
- Summary and discussion

Agenda

- Significant changes in the energy industry
- Creating a roadmap
 - Retail customer survey
 - Utility Assessment
- Case Study #1
- Case Study #2
- Summary and discussion

Enabling Technologies

- Emergence of 5G communications
- Artificial Intelligence (AI) and machine learning
- Emergence of the Internet of Things (IoT)
- Autonomous vehicles (autos and drones)
- Evolving data analytics capabilities
 - Integration across AI, IoT, customers, and grid
- Declining renewable and storage costs
 - Batteries
 - Solar

Strategic Workforce Focus

Players on the bench – Do you have the right mix?

- The Energy industry is evolving at a rapid pace creating both traditional and new skill requirements
- Effective, cross-functional workforce planning tied to an organization's strategic plan will be critical to ensure the right mix of skills

Upskill, buy, outsource, or partner?

- Organizations will be challenged to rethink attraction and retention practices to quickly address changing needs
- Flexible development programs will be required to upskill current resources

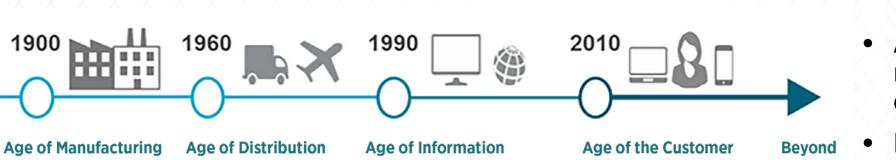

"Strategic business decisions may have profound changes on a company's workforce size, demographic makeup, skill sets, and knowledge requirements."

-Center for Energy Workforce Development, 2018 Game Changers National Strategic Workforce Plan

Customer Expectations

We are now in the "age of the customer"

Mass manufacturing makes industrial powerhouses successful

- Ford
- Boeing
- GE
- RCA

Age of Distribution Global connections and transportation systems make distribution key

- Wal-MartToyota
- P&G
- UPS

Age of information Connected PCs and supply chains mean those that control information flow dominate

- Amazon
- Google
- ComcastCapital One

Age of the Customer Empowered buyers demand a new level of customer obsession

- Amazon
- Apple
- Salesforce.com
- USAA

76% of consumers expect companies to understand their needs and expectations

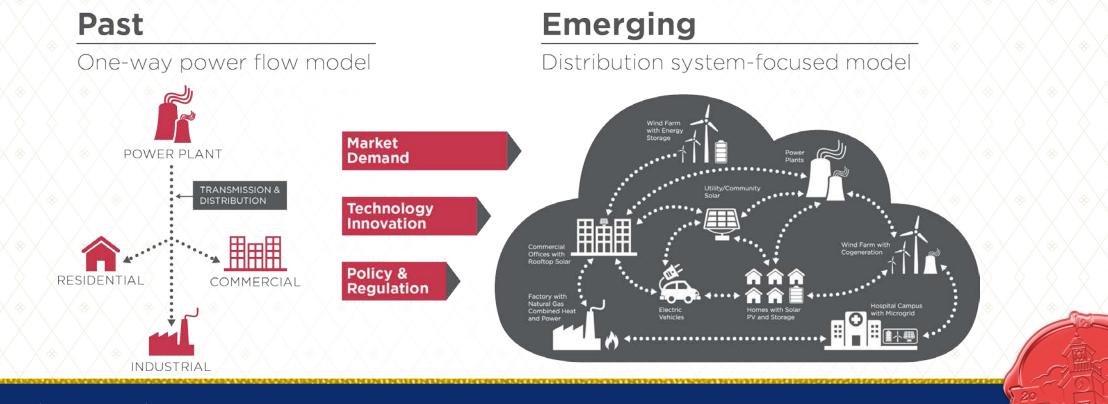

- Amazon singlehandedly raised the bar on customer expectations
- Increased demand for instant gratification and personalization
- Innovation transforms into expectation

(Source: Forrester Research, Inc.)

Infrastructure Modernization

Infrastructure modernization is needed as the energy industry moves from the one-way power flow model to a model focused on the distribution system.

Non-Traditional Competition

- Retail competition is happening in an unexpected manner
- New competitors are generally not the usual players
- Market opportunity of \$1.3 trillion
- Technology and non-utility experiences are shaping customer expectations
- Customer choice and control

COMPANY	CORE BUSINESS	WHAT IS THE THREAT?
amazon Google 🝏	Tech	Retail customers purchase energy directly from retail giants
∰··· verizon⁄ вт 论	Telecom	Telecom providers utilize utility data to provide energy products to retail customers
	Oil & Gas	Fossil fuel companies provide onsite charging services off of the electric grid
Sonnen SolarCity	DER	DERs continue to get market share and the tech- nology matures to allow cutting ties with the grid
TELE TOYOTA Mercedes-Benz	Auto	Automobiles mature to the point of being grid resources, giving automakers a market opportunity
Drift Current powered by GE	Energy Retail	Retail players continue to find ways to circumvent regulated retail markets

Three Areas of Focus

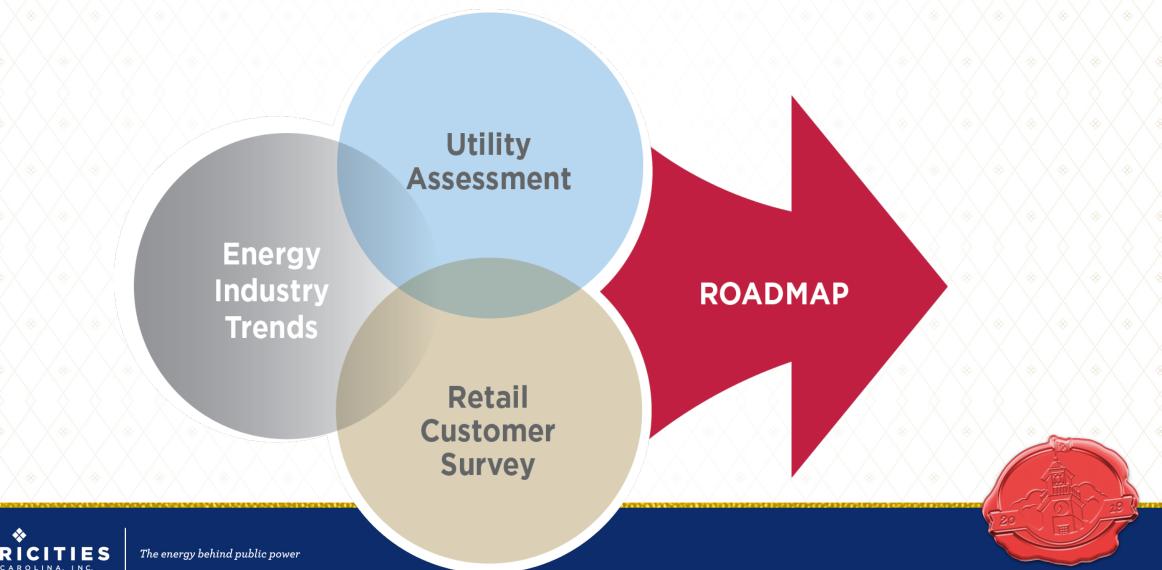

Agenda

- Significant changes in the energy industry
- Creating a roadmap
 - Retail customer survey
 - Utility Assessment
- Case Study #1
- Case Study #2
- Summary and discussion

Creating a Roadmap

ECT

Retail Customer Survey

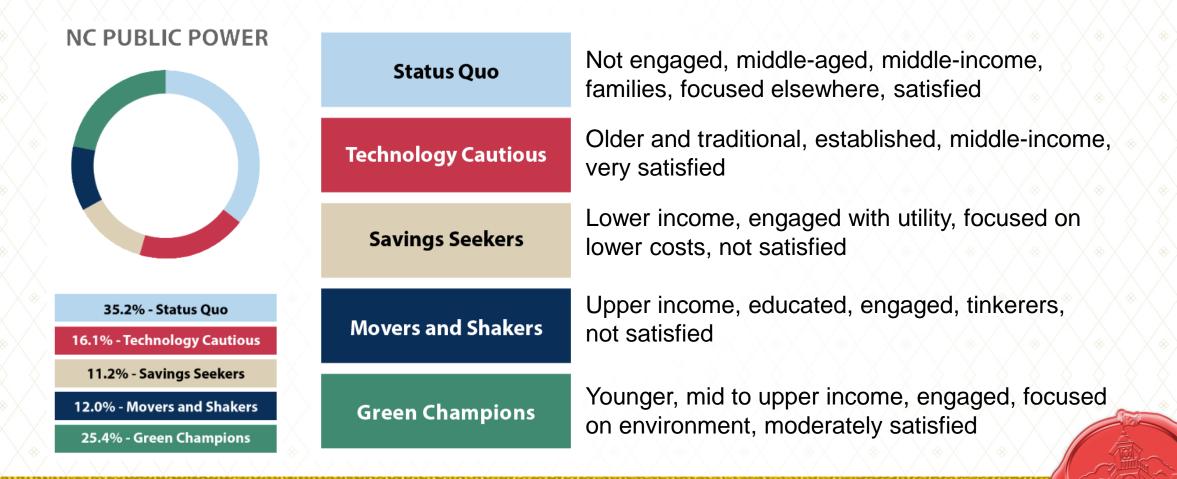

2017-2019 Survey Participants

Apex Ayden Belhaven Benson Cherryville Clayton Cornelius Edenton Elizabeth City Farmville Fayetteville PWC Gastonia Huntersville Lexington Lincolnton Louisburg

Lumberton Maiden Morganton New Bern New River Light & Power Newton Pineville **Rocky Mount** Shelby Smithfield Tarboro Wake Forest Washington Winterville

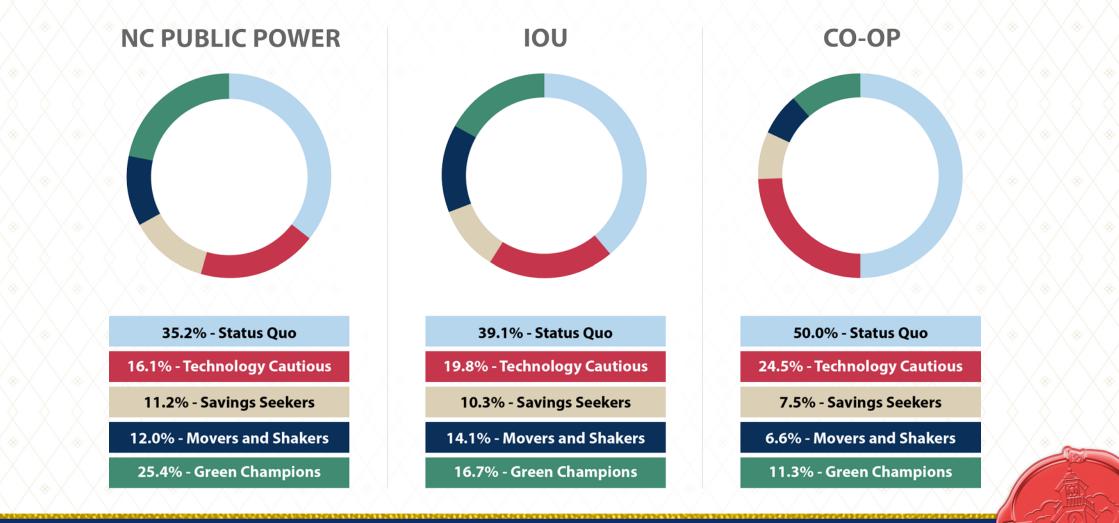

Customer Survey: Market Segments

Customer Survey: Market Segments

Retail Customer Survey Results

	NC Public Power Residential*	IOU Residential*	Rural Electric Coop Residential*
Communicating with customers	79.2	77.7	84.9
Providing services and products I expect of a modern utility	84.4	83.4	89.4
Reliable electric service	91.6	90.5	92.8
Providing good value for the cost of electricity	66.3	65.2	74.3
Responsible steward of the environment	84.0	64.0	85.0
Responding promptly to questions and complaints	84.4	79.2	85.3
Helpful and knowledgeable staff	86.9	82.3	90.0
Being supportive of community activities and events	89.5	82.5	90.2
Overall satisfaction	83.3	83.4	88.2

The energy behind public power

*NC Public Power Benchmark and Competitor Benchmarks were derived from the aggregate ratings from 2017-2019.

Utility Assessment

40 members responded in 2018 (45%)

Topics Covered:

- Strategic Planning
- Finance & Capital Spending
- System Losses
- Outsourcing
- Customer Engagement
- Value of Public Power
- Reliability

SAIDI = System Average Interruption Duration Index (measured in minutes/customer/year) SAIFI = System Average Interruption Frequency Index (measured in number of outages/customer/year)

- Technology
 - 26% of members have AMI
- Security
- System Maintenance
- Safety
 - Members average 1.38 reportable safety incidents per 200,000 hours worked

AVERAGE 6.7%

RELIABILITY NCPP SAIDI NCPP SAIFI 54.19 0.67

ELECTRICITIES

ROADMAP – Key Questions

How do I know where I am NOW?

- Retail Customer Survey
- Utility Assessment

How do I know where I SHOULD be?

- Retail Customer Survey (every 3 years)
- Utility Assessment
- Monitoring traditional competitors, as well as non-traditional competitors (e.g., Google)

Checklist for Success

□ Independent assessment of prerequisite staffing needs/requirements

Links back to customer expectations and/or competition (existing or potential)

Understanding of costs and willingness to pay

Realistic schedule of expectations

Utility Assessment for Case Study #1

- **SAIDI:** 65 minutes/year
- **Cost:** Lower than all traditional competitors
- **Staff:** Appropriate capabilities on staff or through contracts
- Procedures: <u>Missing security and emergency</u> response procedures
- Cost of Service: Performed recently
- **Billing System:** Advanced Meter Infrastructurecapable billing system in place
- Customer communication plan: Plan in place
- Meters: <u>Automated Meter Read</u>

- Online bill pay: In place
- Access to high speed data: Yes
- Long-term Planning: Long-term capital plan in place (investment criteria)
- Strategic Plan: Not in place
- Tech Roadmap: Not in place
- Outage management system: Not in place
- Time of use rates: Not offered
- Analytics: Not in place
- Smart city: No smart city capabilities

Example #1

Case Study #1: Recommendations

- Suggested immediate actions:
 - Address procedure gaps
 - Root cause analysis on SAIDI
- Suggested foundational first steps:
 - Develop utility strategic plan
 - AMI pilot
- Strategic next steps:
 - Develop customer program roadmap
 - Develop technology roadmap
 - Implement first customer program
 - Deploy AMI

Completion Date

Immediate Immediate

Early 2020 Early 2020

2020 2020 Early 2021 2021

REMEMBER!

Do all of this is in addition to:

- Maintaining your operation
- Maintaining a skilled workforce
- Continuing to collect data on customers and metrics

Agenda

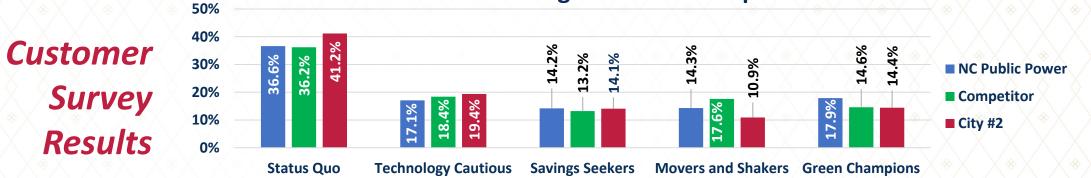

- Significant changes in the energy industry
- Creating a roadmap
 - Retail customer survey
 - Utility Assessment
- Case Study #1
- Case Study #2
- Summary and discussion

Case Study #2

Residential Segmentation Comparison

	Town #1 Residential	NC Public Power Residential*	IOU Residential*	Rural Electric Coop Residential*
Communicating with customers	83.4	77.9	77.4	82.1

f

ROADMAP – Key Takeaways

- All groups have some number of customers from Group D (Green Champions and Movers & Shakers). It's important to monitor that customer segment.
- You don't have to make an entire move to another group. Selecting elements to implement from another group may make more sense.

"A **GOOD** hockey player plays where the puck is. A **GREAT** hockey player plays where the puck is going to be."

- Wayne Gretzky

Key Takeaways for Public Power

R

"Both the External and Internal Game Changers indicate a shift to an industry that is more rapidly transforming, with technology playing an increasingly important role"

Center for Energy Workforce Development, State of the Energy Workforce 2018 report

To be successful in this environment, Public Power utilities must do the following:

- Focus on customers more than ever before
- Adopt a strategic plan, an entrepreneurial outlook, and identify new business opportunities
- Recruit and retain key employee skillsets (new and old), and pay competitively
- Identify value in partnerships and collaboration, both internally and externally
- Continually remind all stakeholders of the Public Power value proposition; shamelessly selfpromote
- Take more risks, accept failures and learn from them
