**Trilliant Networks
Creating Actionable
Intelligence & Connected
Devices**

We Make Connections

Trilliant is a Connectivity Company

We provide infrastructure solutions that enable actionable intelligence with an **open and secure** communications platform and approach.

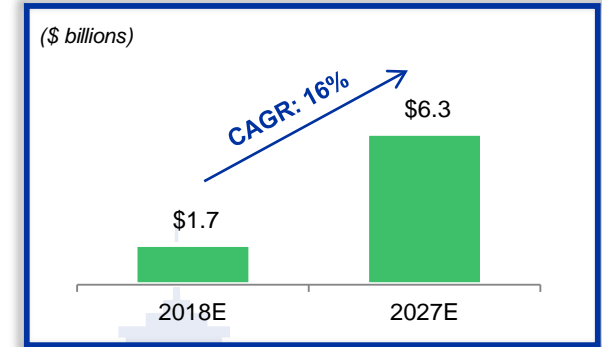

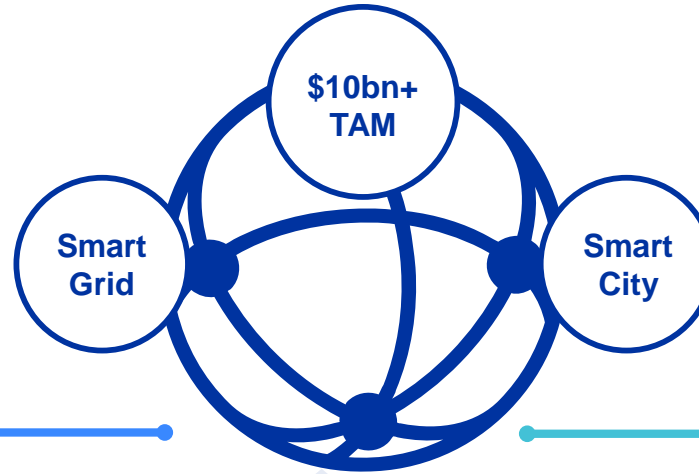

The next generation smart solutions will be built on a network that allows for the **frictionless exchange of data** will propel the energy industry to a bright future.

Our advanced **hybrid wireless communication** platform is designed to work with any system to provide a secure, powerful actionable source of data.

We Empower You – By Connecting the World of Things®

Smart Grid & Smart City Markets

Waste

- Waste Disposal Management
- Waste Collection Routes

Transportation

- Real-time Public Transit Info
- Intelligent Traffic Signals
- Smart Parking
- Vehicle Detection
- Traffic Control / Management

Energy

- Advanced Metering Infrastructure
- Smart Grid
- Smart Street Lights
- Energy Consumption Tracking
- Distribution Automation Systems

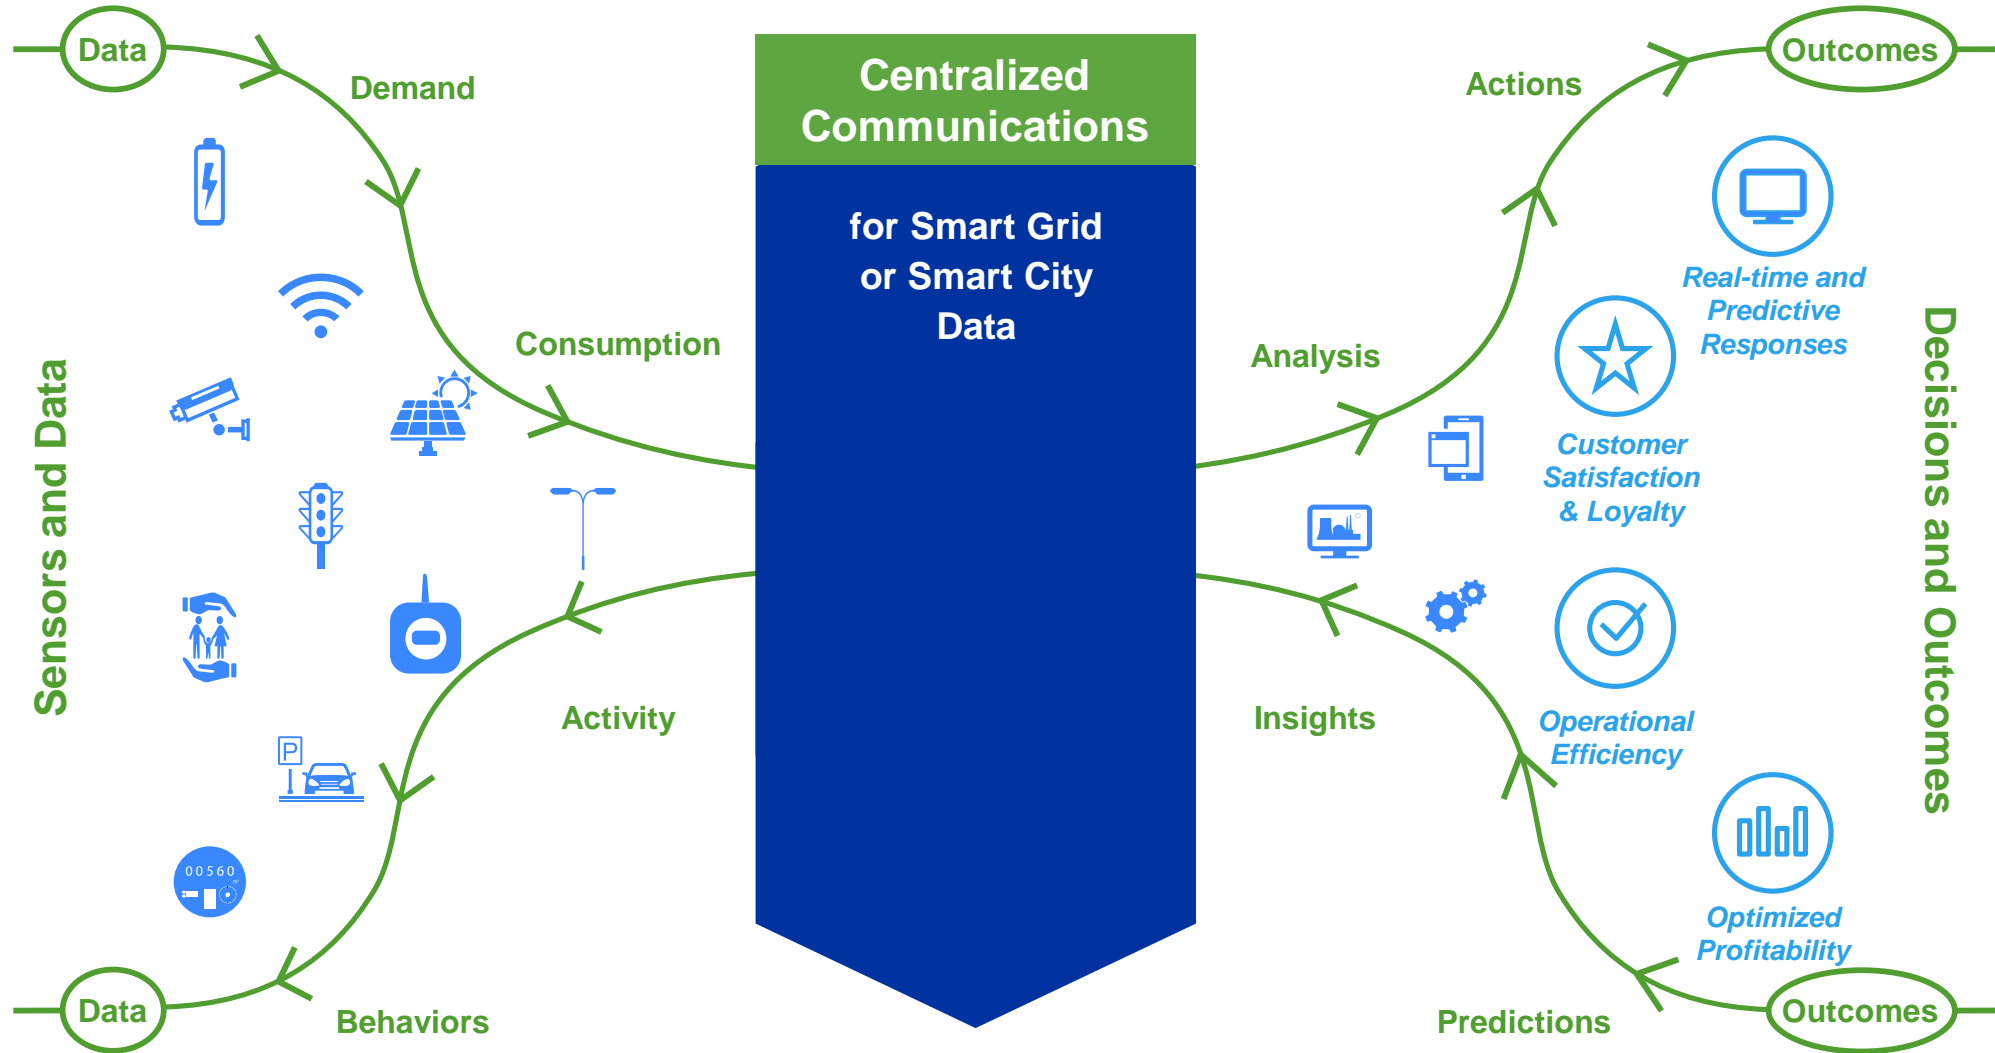

Security

- Crime Prevention
- Smart Video Surveillance
- Emergency Response
- Crowd Management
- Gun Shot Detection
- Motion Detection

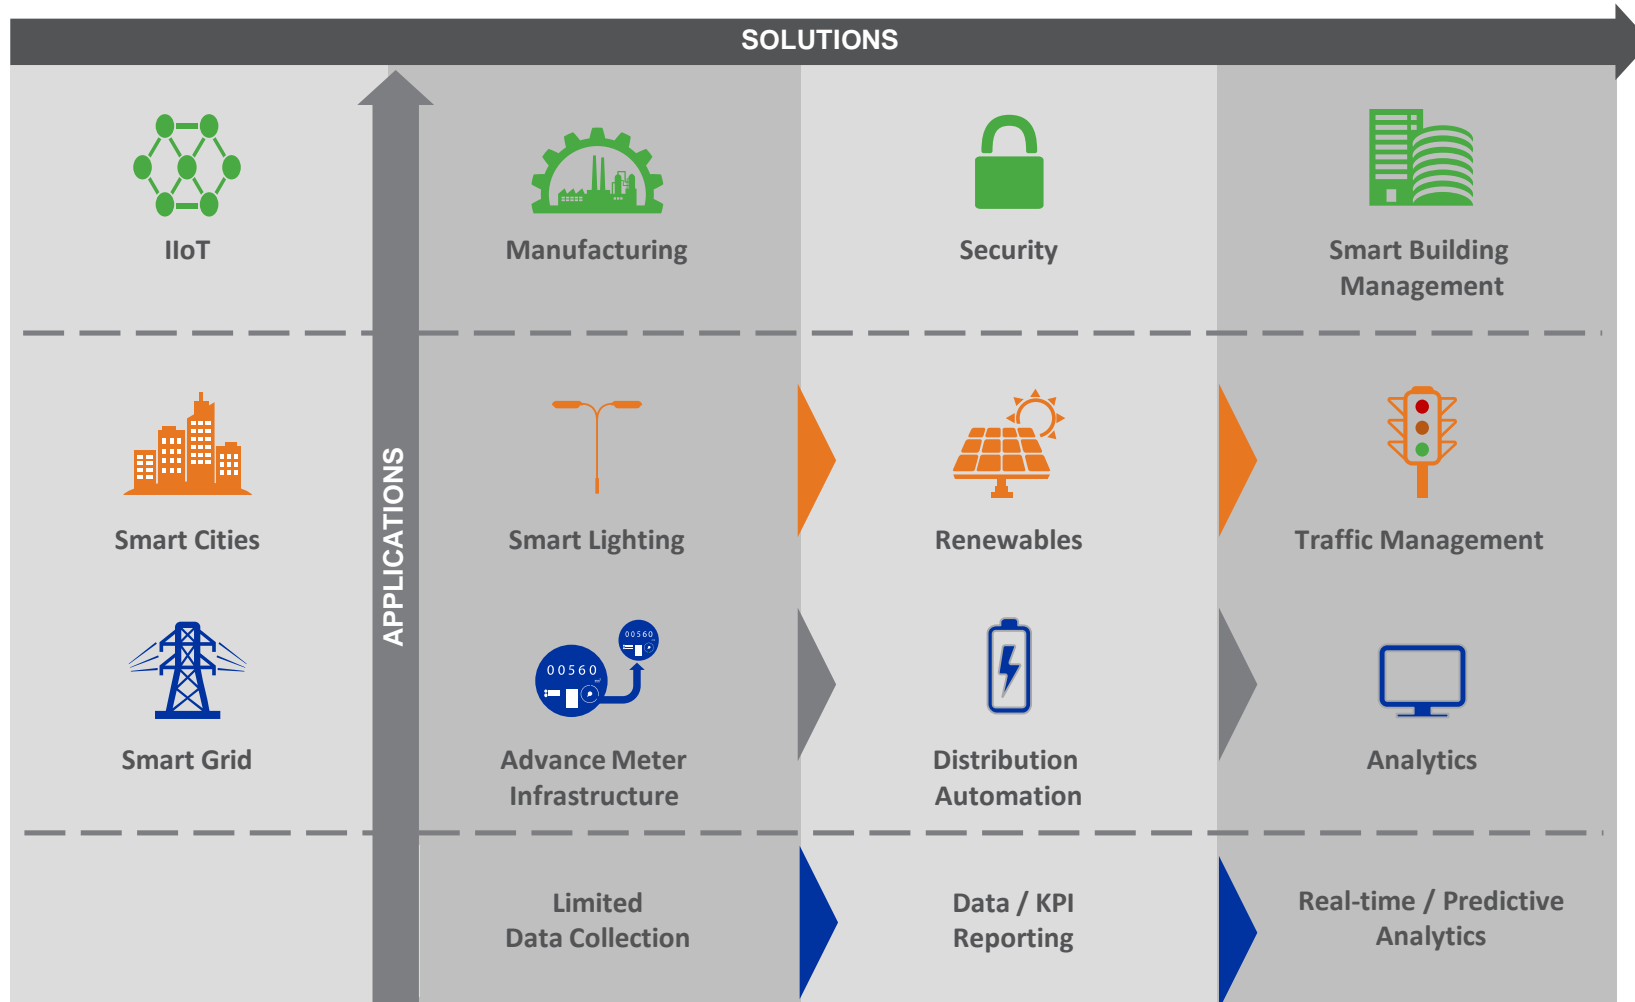

Environmental

- Pollution Control
- Sanitation Detection
- Irrigation Sensors
- Chemical Detection
- Water Flooding
- Weather Tracking

Enabling Outcomes

Industry Trending Towards a Unified Platform

- ✓ Solutions must enable and deliver critical outcomes
- ✓ Communication networks that support smart grid applications will serve as the backbone to support additional Smart City and IIoT applications
- ✓ Deploying a high capacity communications network will deliver connectivity driven outcomes in a wide range of domains, including Smart City applications such as smart street lighting, smart parking, transit services, security, and more
- ✓ Provides real time data for predictive analytics

Smart Grid and Smart City Solutions

Solutions must enable and deliver critical outcomes

Public Safety

- **30–300** lives saved each year in a city of 5 million
- **30–40%** reduction in crime incidents
- **20–35%** improvement in emergency response time

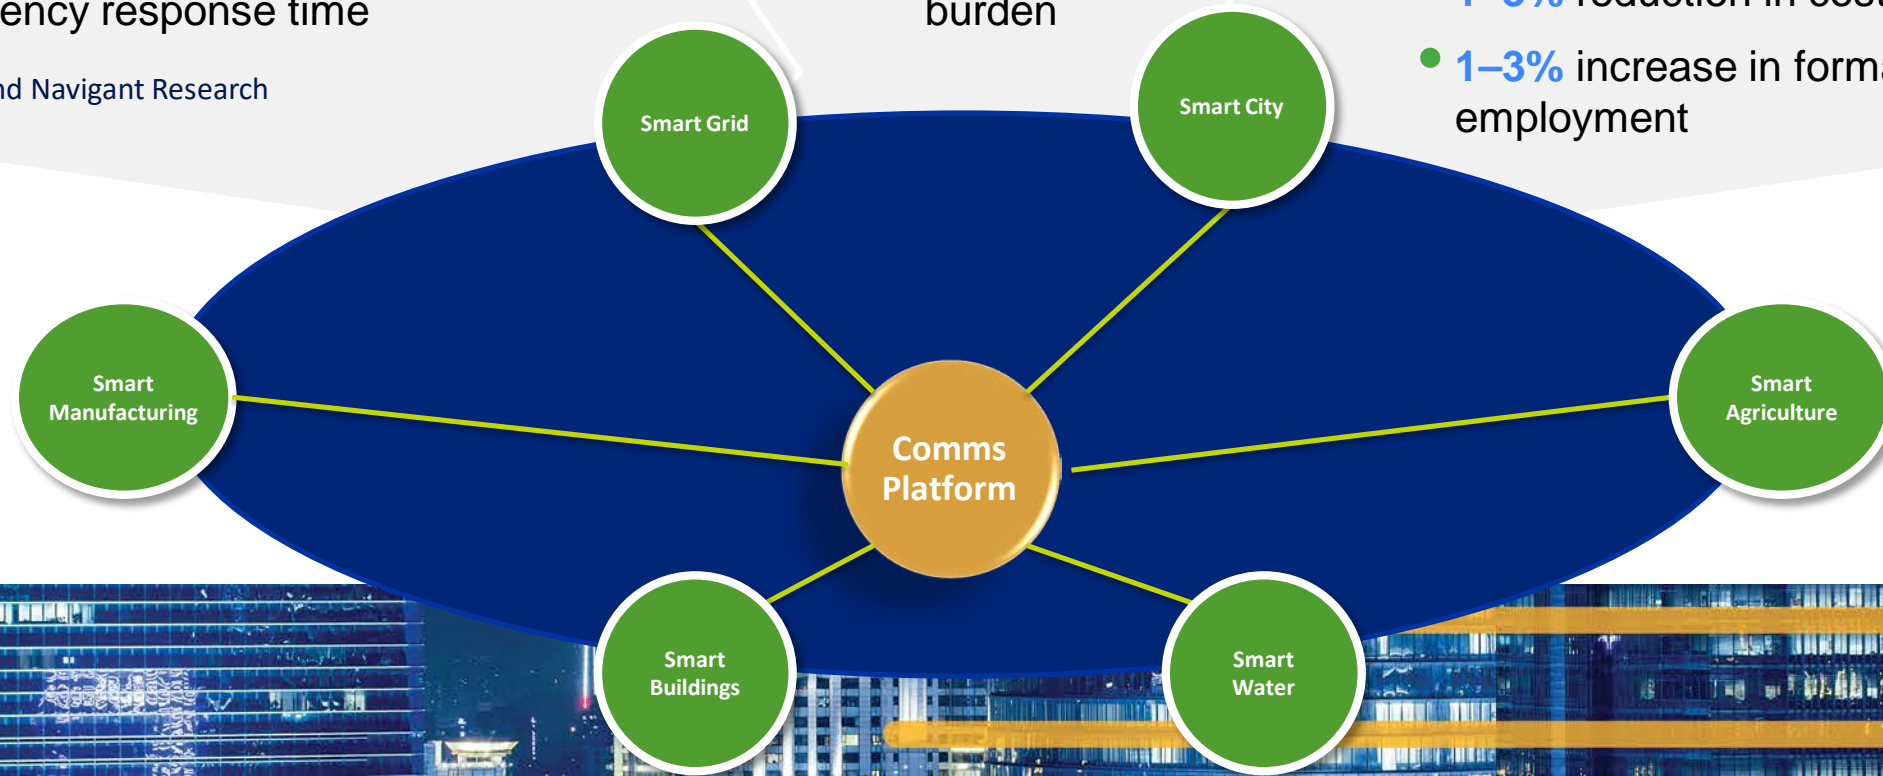

Sustainability

- **25–80 liters** of water saved per person per day
- **65–75%** energy savings with connected LED streetlights
- **8–15%** lower disease burden

Quality of Life

- **15–20%** reduction in commute time
- **45–65%** reduction in time spent interacting with healthcare and government
- **1–3%** reduction in cost of living
- **1–3%** increase in formal employment
