

# WHO'S THE SHARPEST TOOL IN THE BOX?

*That's you.*

When it comes to reducing your energy use, you're the sharpest, most powerful tool in your toolbox. Try these small actions that can have a significant impact—no gauze or bandages required.

- Turn off things you're not using, like the lights when you leave a room.
- Check your air filters monthly. Change them if needed.
- Replace your old lightbulbs with LED bulbs.
- Set or program your thermostat so your HVAC system runs less when you're not home.

For more ways you can reduce your energy use, visit [www.Energy.gov/Save](http://www.Energy.gov/Save).
